Problems in DeFi Trading

Traders' Challenges:

- Spot trading limits earning potential.
- Futures trading is restricted to popular tokens on CEX.
- CEX risks: blocking, complicated listings.

Meme Token Issues:

High demand but short lifecycle.

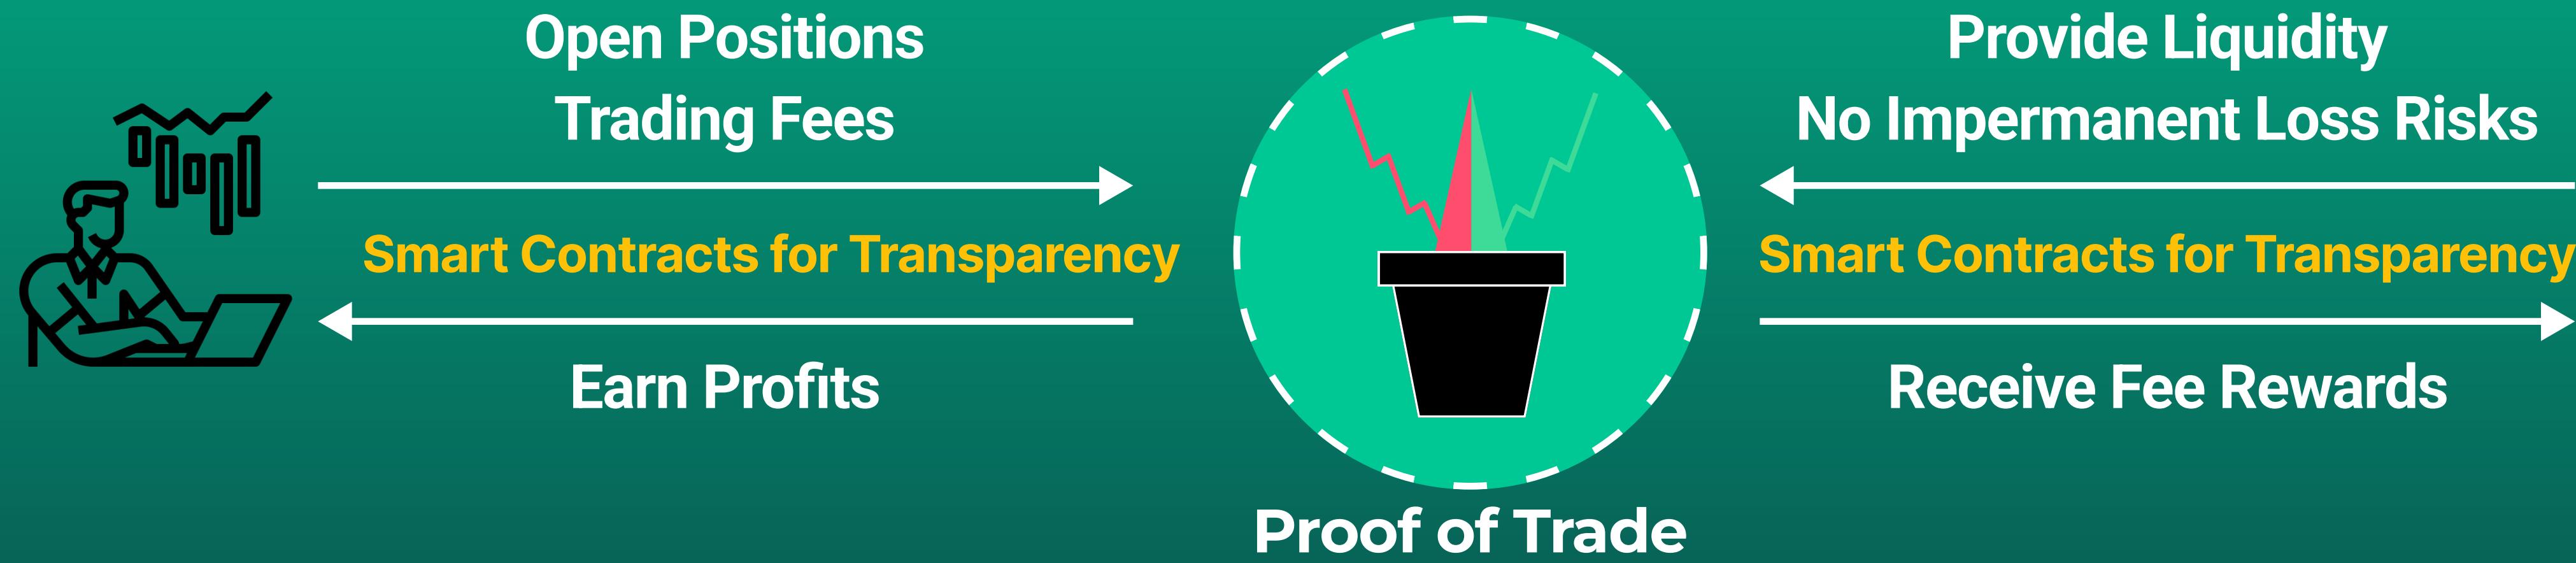

Limited tools for speculation on DEX.

Goal of POT:

Combine meme token hype with futures trading power.

Enable leveraged trading for all tokens, even the niche ones.

Our Solution: Empowering DeFi Traders

Unique Advantages

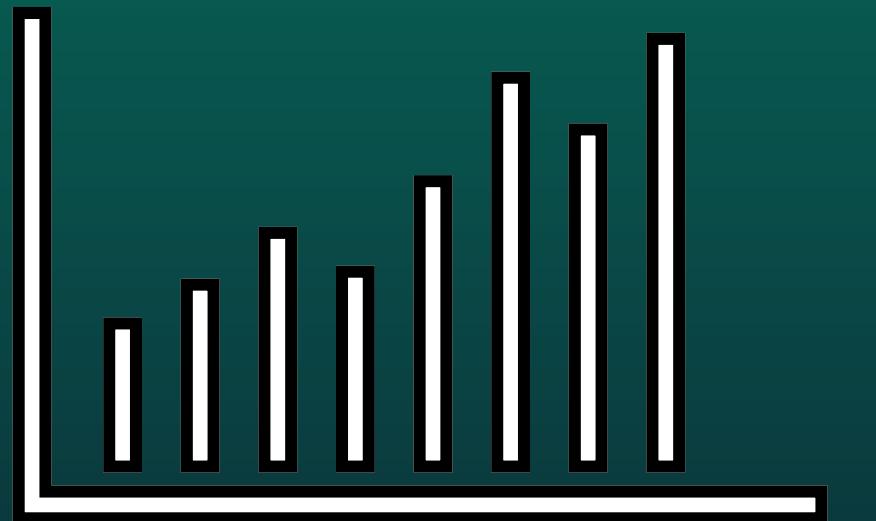

- Accessible futures trading for niche tokens.
- No impermanent loss risks for liquidity providers.
- Profit opportunities in both rising and falling markets.

Key Features

- Open short and long positions on any tokens using smart contracts.
- Risk-free liquidity pools with rewards from trading fees.

Market Data

- \$100B+ Total Value Locked (TVL) in DeFi.
- A rapidly growing ecosystem with immense trading potential.
- 50M+ DEX users worldwide.
- Traders seeking new opportunities in decentralized finance.
- \$11B+ weekly trading volume in meme tokens.
- Meme tokens continue to drive high-risk, high-reward trading activity.

Target Audience

DeFi Enthusiasts:

- 50M+ active users looking for innovative trading tools.
- Early adopters of decentralized financial solutions.

CEX Users Migrating to DEX:

- Leaving centralized exchanges due to security concerns and political risks.
- Seeking transparent, secure, and decentralized platforms.

Meme Token Traders:

- High-risk, high-reward traders embracing token volatility.
- Interested in trading even the most illiquid tokens with growth potential.

How POT Generates Value

Fees collected when undercollateralized positions are liquidated.

LIQUIDATIONS

Trading fees (e.g., 0.05–0.5%) from each transaction.

Liquidity providers earn rewards funded by trading fees.

Future Developments

Trading Features:

- **Long Positions:** Enable leveraged long trades for greater profit opportunities.
- **Limit Orders:** Allow traders to pre-set buy/sell orders for automation.
- **Futures & Options:** Introduce on-chain derivatives for advanced strategies.

Additional Innovations:

- **NFT Marketplace & Rent:** Allow NFTs to be used as collateral for loans.

Liquidity Innovations:

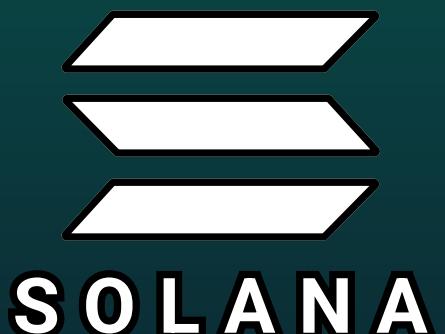

- **Concentrated Liquidity:** Maximize efficiency for liquidity providers.
- **Custom Token Minting:** Allow users to mint tokens with lower fees using on-chain tools.

Community Features:

- **Referral Program:** Incentivize users to invite others to the platform.
- **On-chain IPOs:** Allow startups to launch public offerings directly on the blockchain.

Blockchain Expansion:

- **New Blockchains:** Add support for Solana and Ethereum ecosystems.

Financial Overview

Key Costs:

- Team:

- Backend Developer (Blockchain): \$4,000/month
- Frontend Developer: \$3,500/month
- DevOps & UI/UX : \$3,500 total

- Infrastructure:

- Initial Expenses:

- Marketing, Reserv: ~\$10,000
- Smart Contract Audit: ~\$30,000–\$40,000

Monthly Cost: ~\$14,500

Revenue Streams:

- **Trading Fees:** 0.1–0.5% per transaction
 - *Example*: 1,000 users, \$1,000 monthly turnover → \$10,000–\$50,000/month.
- **Liquidity Rewards:** Fees from user-provided liquidity.

Let's Collaborate for a Smarter Trading Future

Why Join Us?

- A clear vision to disrupt margin trading with a decentralized platform.
- Leveraging the growing TON blockchain ecosystem.
- High revenue potential with scalable growth opportunities.

How You Can Contribute

- **Invest in Our Vision:**
Minimum investment: \$5,000 to development POT.
- **Join Our Team:**
Seeking experts in blockchain and frontend development.
- **Partner with Us:**
Collaborate on marketing, liquidity provision, and ecosystem growth.
